

Brilliant's New PoE Control

PoE allows for flexible installation at optimal heights and locations. This professional-exclusive solution delivers superior reliability through hardwired connectivity and solves network congestion issues in large homes. Built on an ecosystem of smart home device integrations, our PoE Control offers a modern, cost-effective alternative to complex legacy automation systems.

Works with these popular smart home products and more

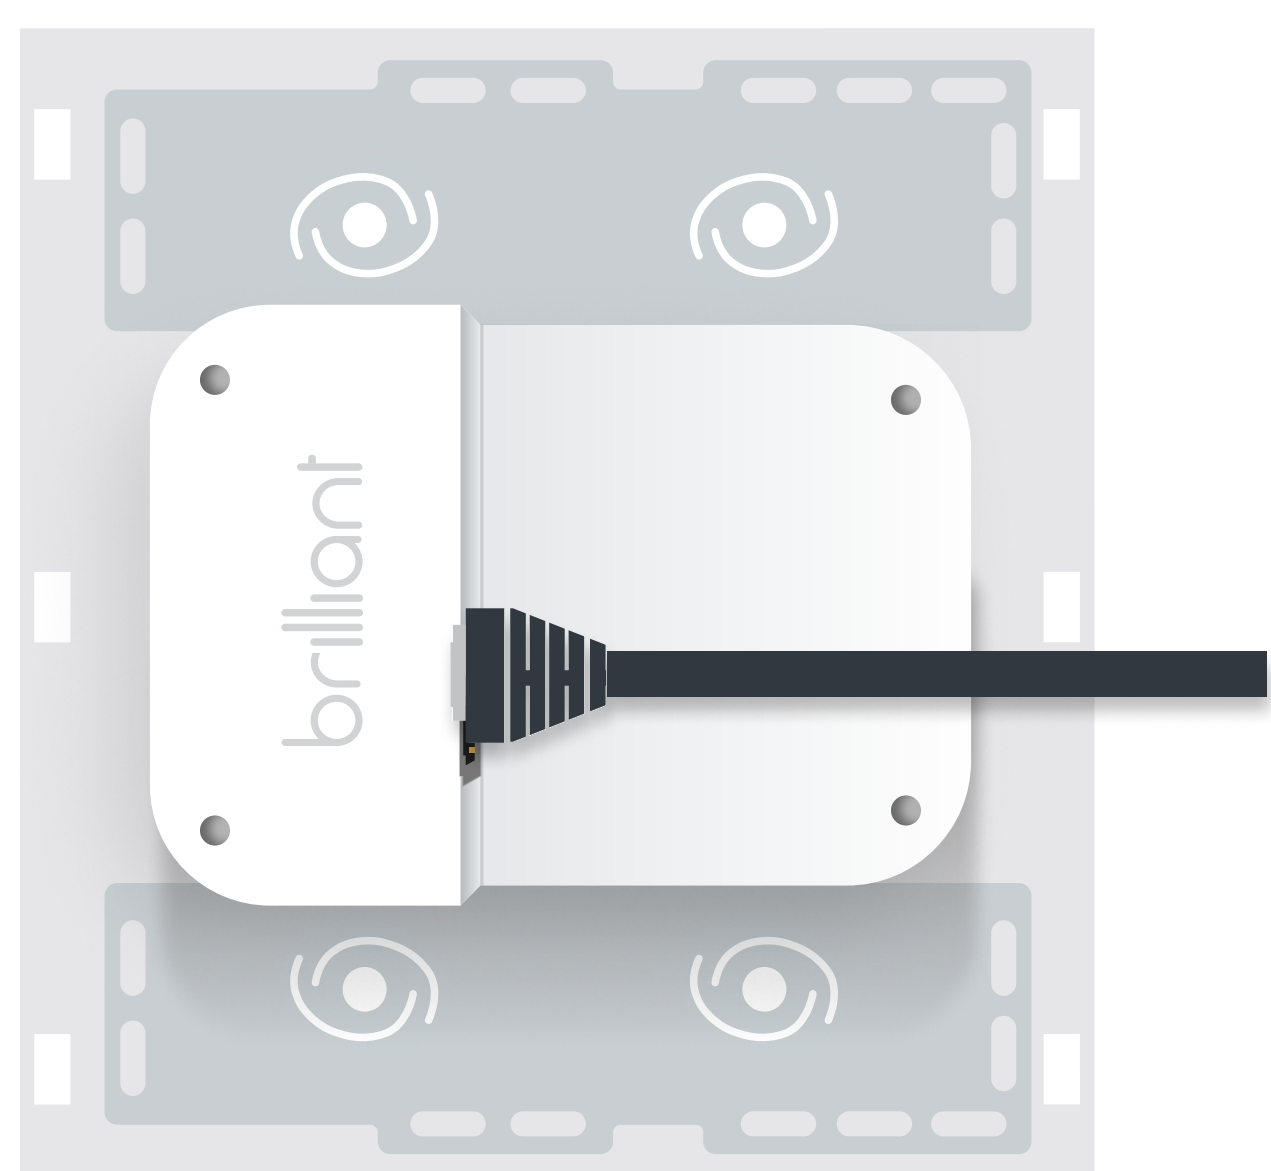

Brilliant PoE Smart Home Control

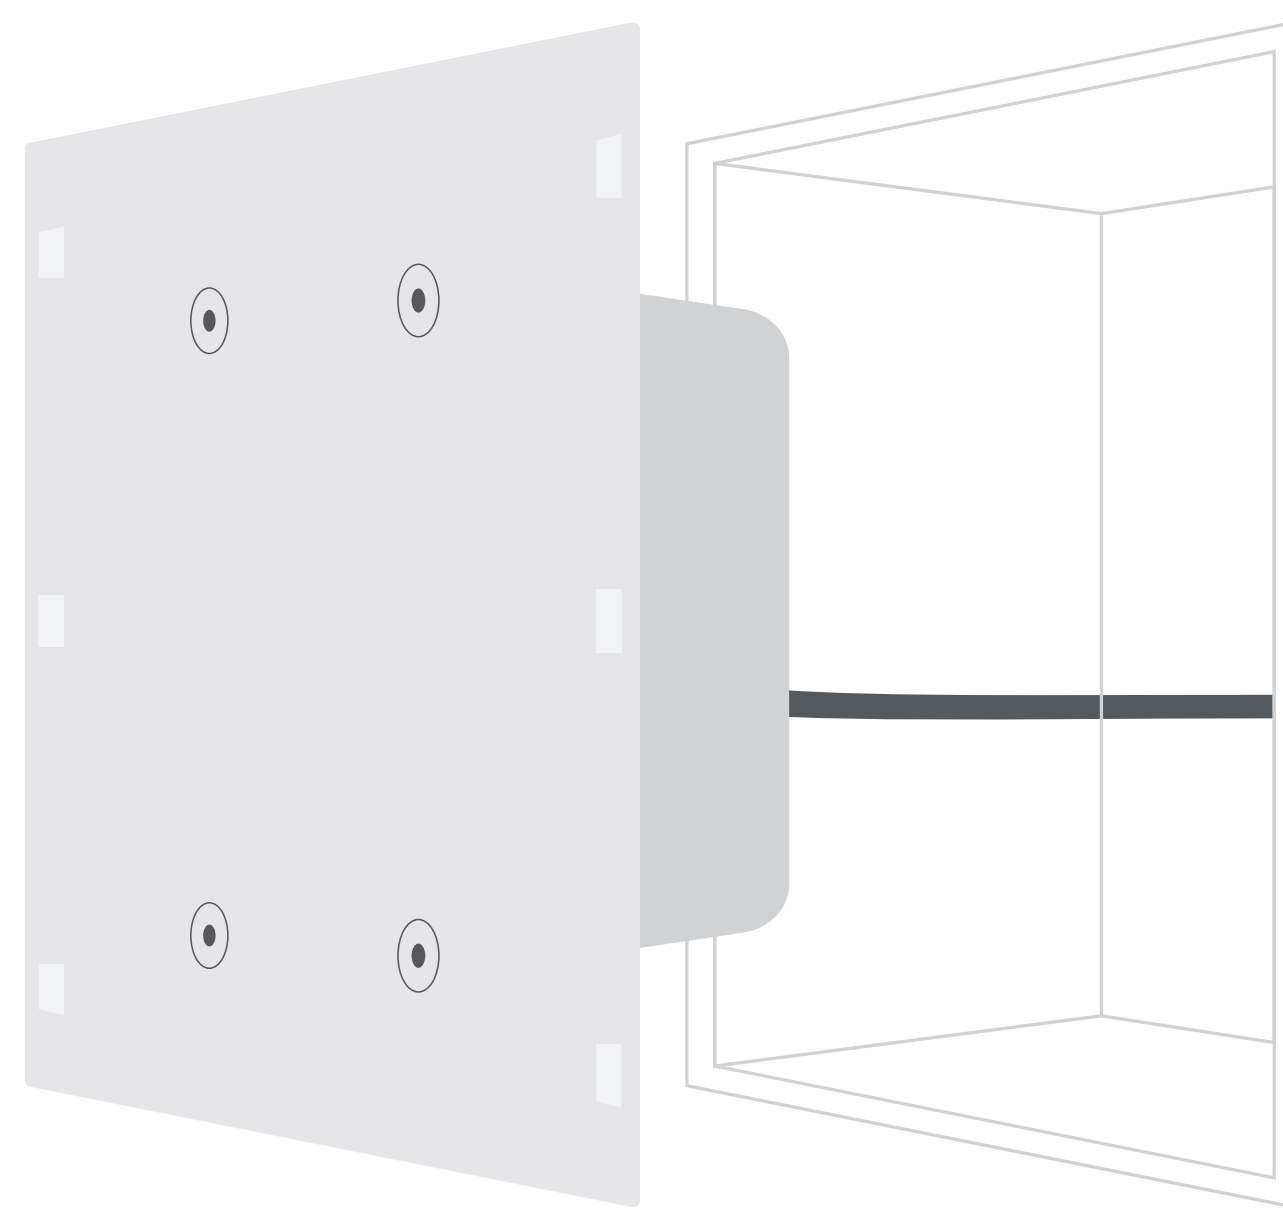

- Provides both power and data over Ethernet, delivering consistent performance and reliability in dense or high-traffic environments.
- Reduce labor, time, and cost for installation.
- Mounting is not restricted to standard switch gang boxes — the unit can be installed at optimal height or any preferred location.
- Available exclusively to professional installers, expanding available PoE control options.
- Designed for direct replacement of legacy PoE systems for easier system upgrades.

EASY INSTALLATION

Insert PoE cable into the base of the PoE Control

Mount base to the wall using bracket or gangbox

Attach Second Generation faceplate to the base

TECHNICAL SPECIFICATIONS

Compatibility & Requirements

- Faceplate: Brilliant Second Generation, 2-gang Faceplate only
- Cabling: CAT5 / CAT6 Ethernet
- Maximum Cable Length: 300 ft (PoE injector → PoE base, tested)

Power over Ethernet (PoE)

- IEEE 802.3af (PoE) compliant
- IEEE 802.3at (PoE+) compliant
- IEEE 802.3bt (PoE++) compliant

Performance

- Provides identical functionality and user interface as Brilliant Wired Control
