Voice Assistant

Not all smart home systems are created equal

Brilliant fills the gap between basic voice assistants and expensive custom systems. Easily installs in existing light switch locations and available from certified professionals who can design and configure a system for the whole home. With dozens of integrations, it works with your existing and future smart devices. Professional results, without the custom price tag.

A L E X A | G O O G L E | A P P L E

More smart speaker than smart system

DIY only - no professional installer options or troubleshooting

Limited home automation depth

Privacy concerns

Bloated app experience not focused on smart home control

Devices clutter up counter space

$

brilliant

High-end features at a fraction of the price

Premium on-wall control panel that serves as the command center for your home

Works with smart home devices you already own

Intuitive interface making it easy to set up scenes and automations

Optional Brilliant Max subscription leverages curated automations to let your smart home run itself

Powerful, but pricey - and you are not in control

Expensive equipment that often requires extensive project scoping, rewiring and programming which adds cost and time

Personalization, troubleshooting, and complex configuration changes require a costly service call, takes a long time to implement, and often requires a technician to be on site

Often requires a dedicated space for a full server rack of hardware
